

Shiva Boya

Full Stack Engineer

✉ shivasiddu80@gmail.com — 📞 9398462802 — 📍 Bangalore, Karnataka — 🔗 LinkedIn — 🐙 GitHub

Professional Summary

Results-driven Full Stack Engineer with expertise in JavaScript, React.js, Node.js, Express.js, MongoDB, PostgreSQL, and AWS cloud services. Experienced in building scalable web applications, REST APIs, real-time systems, and responsive user interfaces with strong focus on performance optimization, backend architecture, and seamless user experience.

Professional Experience

PropFTX

Full Stack Engineer

Bangalore

Feb 2026 – Present

- Built and deployed a high-performance data aggregation system using Node.js and AWS Lambda for real-time portfolio analytics and dashboard metrics.
- Developed a secure multi-device access management system using JWT authentication and session validation, improving account security and session management workflows.
- Designed and implemented an event scheduling framework with conflict detection and seamless frontend-backend synchronization using React and AWS Lambda.
- Developed the complete Resale Module from scratch including database schema design, RESTful APIs, frontend interfaces, and payment integration workflows.

Web3Today

Full Stack Web Developer

Hyderabad

Dec 2025 – Feb 2026

- Built scalable React.js applications with digital wallet API integrations for seamless and high-performance user experiences.
- Developed a Telegram Mini App featuring a Slash game, crypto wallet integration, dynamic UI, and admin dashboard functionality.

Projects

Full Stack Resume Builder

Live Link — GitHub

- Integrated AI-powered suggestions and real-time resume preview features to enhance personalization and user experience.
- Implemented Razorpay payment integration for secure and seamless transaction processing.

Roamly – Smart AI Planner

Live Link — GitHub

- Built an AI-powered group outing platform with live chat, polls, itinerary planning, and collaboration features.
- Implemented Socket.IO-based messaging and AI-driven recommendations for scalable real-time interactions.

CineDash – Movie Dashboard

Live Link — GitHub

- Built a Netflix-style movie dashboard with premium UI and smooth user experience.
- Integrated IMDb APIs for dynamic movie suggestions and real-time data fetching.
